**Scientific Committee:**

F. Kirwan (University of Oxford)  
Y. Manin (Max-Planck Institute für Mathematik)  
F. Oort (Universiteit Utrecht)  
S. Payne (Yale University)

**Organising Committee:**

R. Abuaf (Université Joseph Fourier)  
P. Achinger (University of California, Berkeley)  
M. Donten-Bury (Uniwersytet Warszawski)  
F. Poma (SISSA)  
M. Pumperla (Universität Hamburg)  
N. Tarasca (Leibniz Universität Hannover)

**Invited Speakers:**

S. Grushevsky (Stony Brook University)  
*"Curves, abelian varieties and the Schottky problem"*  
K. Hulek (Leibniz Universität Hannover)  
*"Moduli of K3 surfaces and irreducible symplectic manifolds"*  
B. Toën (Université de Montpellier 2)  
*"Introduction to derived algebraic geometry"*

Grenoble, France

June 18–22 2012

GAeL, Géométrie Algébrique en Liberté, is a conference organised by and for researchers in Algebraic Geometry at the beginning of their scientific career. The conference gives PhD students and post-docs the opportunity to lecture, often for the first time, in front of an international audience. In addition, selected international experts deliver mini-courses on topics at the cutting-edge of important new developments in Algebraic Geometry.
